Late of Gay & Martin.

Let none deceive themselves, for it is a truth that a neglected cold, estarrh of the head, throat disease or bronchitis, ends in consumption and death. It may be sooner or later, the progress of the disease may h rapid or slow, but the result is inevitable But, now to cure these diseases of the throat and lungs, how to cure catarrh, asthma and bromchitts, and other diseases that lead to consumption, is a most perplexing inquiry. But the experience of others and common sense settle that matter. There was a time sense settle that matter. There was a time sense settle that matter. But, how to cure these diseases of the throat sense settle that matter. There was a time when all sorts of drugs and poisonous com-pounds were forced into the somes with the hope of caring such complaints; but the ut ter and invariable failure of this practice year after year, has led to the mise dogma that these diseases were incurable, and final-ly the aim of the physician, himself disheartened, was merely to palliate and smooth the passage of the poor consumptive to the tomb.

Persevering inquiry led to the discovery of now and important truths. We now address the remedial agents directly to the parts discosed; and in this lies the chief secret of the remarkable success of Dr. Jerone Pancor's all other modes of medication have failed. m
